- The Future of Business in 2030, According to AI - Will Your Company Lead or Lag in the Intelligence-Abundant World?
- The Intelligence Symphony - The Rise of the 6th Generation Company and a New Business Order
- Transform to Thrive in a Chaotic World - the Twin Meta-Models for Leading in a More Uncertain and Complex Environment

### BIOGRAPHY

---

## Preparing Leaders for an Intelligence-Abundant Future

Charlie's work focuses on how emerging technologies are reshaping companies, industries and work. His thinking sits at the intersection of futures, leadership, workforce transformation and technology, giving audiences a useful way to understand what is changing and why it matters. In 2013, Charlie coined his AI-centric 4.0 model, which pre-dated and closely aligned with what the World Economic Forum later referred to as the Fourth Industrial Revolution. Today, his keynotes help organisations understand how artificial intelligence, robotics, platforms and digital business models are changing the future operating environment. Rather than treating AI as just a grand concept, Charlie shows leaders how to turn it into strategic advantage.

## The Future of Business in 2030

One of Charlie's keynote topics is *The Future of Business in 2030, According to AI*. This forward-looking keynote reveals the deep fundamental shifts that AI may bring to business, work and talent. Charlie explores how companies can prepare for changing customer expectations, new competitive dynamics, different workforce structures and fresh opportunity spaces. The session is built for business leaders, strategists, innovators, transformation teams and senior executives who need to sharpen their North Star vision, transformation agenda, innovation strategy, technology roadmap and leadership priorities. Charlie gives audiences actionable insights they can use to think more clearly about the future of business and the role their company could play in it.

## The Intelligence Symphony

In *The Intelligence Symphony*, Charlie looks at how next generation companies can combine artificial intelligence with human ingenuity. Charlie calls this the rise of the sixth generation company. It follows earlier business models such as the incorporated company, the industrial organisation, the multinational corporation

and the digital business. The message is clear: the companies that succeed in an intelligence-abundant future will not simply use more technology. They will rethink how people, machines, data and decision-making work together. For corporate audiences, this keynote is a practical way to explore breakthrough innovation, exponential growth and the changing role of leadership in the age of AI.

## Leading Through Constant Disruption

Charlie also speaks about how leaders can respond to disruption, uncertainty and the “Perfect Storm” of the 2020s. His talks explore the combined impact of technological acceleration, geopolitical change, climate pressure, demographic shifts and rising customer expectations. For many organisations, these pressures are already changing strategy, operations and talent planning. Charlie helps leaders step back from the noise and make better decisions. His approach is not about chasing every new trend. It is about understanding the future clearly enough to choose what matters, where to act and how to lead.

## Building a Future-Ready Workforce

Charlie’s work is especially relevant for organisations preparing for the AI generation workforce. As artificial intelligence changes how work is designed and delivered, companies need people who can adapt, learn quickly and work well with new tools. Charlie helps audiences understand which skills are becoming more valuable, how leadership needs to change and how organisations can prepare teams for a more hybrid human-AI future. His message is useful for executive audiences, HR leaders, transformation teams and companies that want to build stronger capability before the next external crisis forces change.

## A Digital Futurist with Strong Business and Technology Credentials

Charlie brings together futurist thinking, technology knowledge and commercial understanding. He holds an MBA from NUS Business School and a First-Class Honours BSc in Computer Science from the University of Manchester. Speaker profiles also note advanced training from institutions including Singularity University, Oxford University’s Saïd Business School, Stanford University and Singapore Management University. His insights have been featured by media including the BBC, National Geographic, Financial Times, The Telegraph, Al Jazeera and Channel NewsAsia. He has also delivered keynotes, executive briefings and leadership programmes for senior executives and industry-leading companies around the world. Charlie’s talks are especially valued by organisations that need future-focused thinking made clear, practical and relevant for senior audiences.

## Book Charlie Ang for Your Next Event

Book Charlie Ang if you want a keynote speaker who can help your audience understand AI, disruption and the future of business with more confidence. As an internationally recognised digital futurist and AI strategist, Charlie is a strong fit for leadership conferences, digital transformation events, innovation forums, executive briefings and industry gatherings. ## WHAT PEOPLE SAY

---

*"Your insights were not only thought-provoking but also incredibly inspiring. The way you broke down complex concepts and made them accessible was remarkable. I've already heard so much positive feedback from attendees who were captivated by your ability to connect the dots between emerging technologies and real-world applications. It's clear that you have a deep passion for the subject, and it really shone through in your talk."*

**— Innes Macleod, Innotribe & Discover Manager, Swift | Sibos**

*"Your insights into the Fourth Industrial Revolution and its impact on our lives and businesses were very well received and certainly gave our delegates plenty of food for thought."*

**— Erik Juul-Mortensen, President & John Rimmer, Managing Director, Tax-Free World Association (TFWA)**

*"We could not have done this without your help and would like to extend our most sincere gratitude for your significant contribution in making a success of the Conference. We would specifically like to thank you for your insightful presentation on the "Perfect Storm in 2020s: Previewing and Preparing for the Four Mega-Disruptions" session, and for all the time and effort you have spent on this well-delivered session despite your busy schedule."*

**— Steve Tunstall, Co-founder and General Secretary, Pan-Asia Risks & Insurance Management Association (PARIMA)**
