BIOGRAPHY

Dr Ayesha Khanna—Transforming the Future through AI and Smart Cities

Discover Dr Ayesha Khannaone of the leading artificial intelligence companies, smart cities, and the metaverse. She has been instrumental in shaping the leading smart city initiatives and driving the smart nation vision. With a sterling academic background and a passion for innovation, she also champions artificial intelligence classes to empower future generations as a trailblazing leader in the world of **artificial intelligence (AI)**. She has been the catalyst for transformative change in multiple sectors, leveraging emerging **human technology, civilisation** and accelerating technologies that impact corporations and governments worldwide through her strategic insights and leadership in **data-driven digital transformation**.

Global Influence and Thought Leadership

In her role as the **co-founder and CEO of Addo**, Dr Khanna has reached an unprecedented level of influence in AI technology. *Named one of Southeast Asia's groundbreaking female entrepreneurs by Forbes, she has lent her expertise as a strategic advisor to the world's largest corporations and governments*, helping them disrupt business models and navigate the complexities of emerging technologies. Her deep understanding of AI and disruptive technologies makes her a sought-after thought leader across the globe, frequently engaging with leading corporations and civic stakeholders at industry conferences to share insights on the future of innovation and its impact on the global economy.

Academic Excellence and Credentials

Dr. Khanna's academic credentials are as impressive as her professional achievements. *Holding a BA (Honours) in Economics from Harvard University, an MS in Operations Research from Columbia University, and a Ph.D. in information systems-focused research from the London School of Economics*, her education underscores the depth of her understanding of both data and technology and its socioeconomic implications. For more than a decade, she has explored the dynamics of **human-technology co-evolution**, contributing insights to publications such as the **Harvard Business Review** and participating in academic initiatives at institutions like **Ngee Ann Polytechnic**. Her work often intersects with machine learning, analysing its role in shaping future innovations and decision-making processes.

Board Experience Across Industries

Beyond her CEO role, Dr Khanna has showcased her diverse expertise through her involvement in various boards. From Johnson Controls to NEOM Tonomous, she contributes to the strategic planning and vision of these innovative firms, helping them leverage new technologies for sustainable growth in the era of the Fourth Industrial Revolution. Her service on the Scientific Advisory Board of L'Oréal and the Consumer Committee of the Board for Mercy attests to her multidisciplinary approach to AI and data science. Additionally, *she has collaborated with Germany's largest TV channel and Japan's largest insurance firm, offering insights on technological advancements in the corporate world*. Her advisory roles extend to major financial institutions and a solutions firm, as well as a government agency tasked with shaping innovation policies.

Captivating Speaker and Author

As a compelling orator and writer, Dr Khanna delivers influential books, and innovative firms embrace her insights as she highlights key ideas at esteemed events. Her insights extend beyond the academic realm, touching on practical world examples and the hybrid reality of AI and smart cities. She is a frequent **keynote speaker** at international conferences, drawing on her experiences to engage audiences in discussions about tech trends and how data is shaping technology's transformative impact on various industries and society.

Singapore Government Boards and Innovation Programs

Deeply involved in Singapore's world-class technology sector, Dr Khanna has served on multiple government boards. She's played a key role in programmes designed to steer the nation towards a digitally empowered future, including the SkillsFuture programme, which *she helped to develop as a steering committee member of the Infocomm Media Development Authority and the Singapore Ministry of Education*. Additionally, her collaborations with the Singapore Computer Society have contributed to nurturing innovative leaders and expanding access to free coding initiatives. She has also supported advancements in **data analytics systems**, helping organisations leverage insights for smarter decision-making. As an advocate for AI responsibility, she emphasises ethical innovation to ensure technology benefits society as a whole. Her work aligns with **cutting-edge AI solutions**, including platforms like **Addo AI**, which focus on driving digital transformation across industries.

Are You Ready for the Future?

Dr Ayesha Khanna is not just a spectator but a key player in shaping the future of AI and smart cities. Through her multifaceted roles as an entrepreneur, advisor, and educator, *she navigates the AI journey, leveraging revolutionary technologies and delivering free coding solutions that disrupt industries*, offering a glimpse into what the future could look like. Her expertise also extends to disruptive business models that drive innovation, including emerging fields like edge computing, economic demand, and quantum computing. Additionally, she explores the role of AI in human enhancement, pushing the boundaries of technological evolution. If you're inspired by Dr Ayesha Khanna's work and want to know how her insights could benefit your organisation, don't hesitate to reach out to us.
