Dr Mary Aiken

Cyberpsychologist Prof. Dr Mary Aiken is a world-leading authority on how emerging technologies shape human behaviour. Professor Mary Aiken's work focuses on cyber behavioural profiling, human risk and why Safety Tech plus cybersecurity protects people as well as systems.

KEY TOPICS

- **Cyberpsychology – the Impact of Technology on Humankind**
- **Human Factors in Cybersecurity**
- **Cyber Leadership & the Hybrid Workplace**
- **Environmental, Social & Corporate Governance (ESG) in Cyberspace**
- **Resilience and Wellbeing in the Digital Age**
- **The Emergence of the Global Online Safety Technology, or "Safety Tech", Sector**
- **AI & Ethical Tech: Factoring in the Human**
- **Human and Technical Drivers of Cybercrime**
- **Future Cyber Crime: Technology, Human Behaviour and Criminology**

BIOGRAPHY

Why Book Prof. Dr Mary Aiken

- Clear insight into cyber attacker cognitive vulnerabilities and human-centred defences
- Practical actions to reduce cyber fraud and raise resilience across teams
- An accomplished speaker trusted by governments, industry and civil society stakeholders

Popular Topics For Events

1. Cyber Behavioural Profiling How attackers think, where cognitive biases create openings and how to close them with controls that fit human online behaviour.
2. Safety Tech And Online Safety What Safety Tech is, how cybersecurity protects systems while Safety Tech protects people and how to operationalise both at scale.
3. Cyberpsychology And Emerging Technologies A fast, practical tour of a futuristic cyber discipline covering AI, anonymity, disinhibition and the realities your organisation faces now.

Credentials And Roles

Professor Aiken is Professor and Chair of the Department of Cyberpsychology at Capitol Technology University Washington and Professor of Forensic Cyberpsychology at the University of East London. She is an Adjunct Associate Professor at the Geary Institute for Public Policy, University College Dublin. Prof. Dr Aiken is a member of **INTERPOL's Global Cybercrime Expert Group** and an Academic Advisor to Europol's European Cybercrime Centre.

Research, Policy And Impact

Professor Aiken co led a White House research team during the Obama Administration's initiative on technology-facilitated human trafficking. She advises the UK government's Online Safety Data Initiative that brings together government, academia, industry and civil society stakeholders. Her Safety Tech work with Paladin Capital Group includes the Safety Tech report series, and she contributes to the **Global Cybersecurity Forum**. Coverage of her research includes **the Wall Street Journal.**

Books, Media And Early Career

Mary's decorated career began with the Cyberpsychology Research Centre and evolved into an international agenda linking academia, policy and investment. Her bestselling book The Cyber Effect helped mainstream the science of human online behaviour, while CSI: Cyber introduced the field to a wider audience.

What Your Audience Will Learn

- How to brief boards on human risk and the critical path from behaviour to breach
- How to design safeguards that anticipate cyber attacker cognitive vulnerabilities
- Practical steps to cut cyber fraud and improve online safety outcomes
- Language your leaders can use to align Security, Safety Tech and user experience

Formats And Booking

Keynotes 30 to 60 minutes with optional Q&A. Workshops available as half-day or full-day, tailored to your sector.

Fees And Booking

Prof. Dr Mary Aiken is available for keynotes, inspirational presentations and team briefings. Fees vary by location, format and audience size. Share your event goals, preferred format and budget range, and we will reply with options, including talk only, talk plus Q&A and a short meet-the-speaker call if helpful.
