""What an amazing event. We had a few people out/off-site who dialed in and even they loved his presentation - often something is lost in translation if you are not in the room, but apparently not with Dr Kaku! I have to admit I was a little concerned to begin with - such an amazing mind having to "dumb down" his presentation to us but it was perfect. He read the audience well and of course everyone loved him. Leading up to the event, so many people expressed interest and fascination that their hero was coming in to speak to us - yes there was definitely a huge fan base in the room. He stayed with us and sat to talk further over lunch which although he was invited, isn't expected and sometimes a presenter can feel uncomfortable in that situation, not Dr. Kaku. I can't recommend him highly enough for any audience.""
