Expertise in Communication, Connection, Culture and Leadership

Pellegrino's expertise lies in his deep understanding of human behaviour and communication dynamics. He provides insights into how effective communication can transform organisational culture, enhance productivity, and build stronger relationships. He himself has worked as a gig-economy professional — navigating a world where connection doesn't come built-in. He's had to create it, deliberately and consistently, across borders, time zones, and industries. He has learnt how to stay human in an increasingly digital world — and what's been invaluable in this workspace is knowing what makes a meaningful human connection and how to show up as a human, even when the communication channel is digital.
